

## The Leading exhibition of the HVAC and water-supply Industry in North-West Russia!

# ExpoClimate

International Forum for water supply  
and climate equipment

**12-14 September 2011**

Lenexpo, St.Petersburg, Russia

On behalf of the exhibition companies Primexpo and ITE Group Plc we are pleased to invite you to take part at "ExpoClimate" 2011 - the International Forum for water supply and climate equipment, which will be held in St.Petersburg on 12-14 September 2011. For the first time it will be held as separate project as until 2011 it was part of BalticBuild exhibition (earlier known as Heat\*Vent). The project has been launched as a result of the rapid development of the market and the activity of companies working in this sector. The independent autumn exhibition project will include a separate promotional campaign.

### Forum profile:

- Ventilation and air conditioning
- Utility systems
- Water supply and pumping equipment
- Plumbing
- Sewer equipment
- Pipes and pipeline systems
- Heating and heat supply
- Gas supply
- Electricity supply and electrical equipment
- Energy-saving equipment and materials
- Refrigeration equipment
- Saunas and stoves
- Swimming pools, spas and fountains
- Instrumentation and automation
- Fire –fighting equipment
- Metering and control devices
- Ecological treatment systems

The Forum will bring together companies offering comprehensive professional solutions for water supply, electricity supply, sewerage, heating, ventilation, conditioning and process control, and will be an ideal platform for meetings and professional dialogue between Russian specialists, dealers and distributors and foreign colleagues.

ExpoClimate will be event of a B2B format and oriented towards industry professionals: company executives and directors, representatives of planning organisations and technical specialists influencing decisions on procurement in the company. It is the place where you can meet your target visitors.

The Forum will include a comprehensive business programme, which will facilitate discussion of the implementation of energy-efficient, resource-saving and fire safety technologies and the use of utility systems in low-rise and industrial construction.

### **TAKE YOUR SHARE OF THE RUSSIAN MARKET!**

### St.Petersburg:

- the centre of the North-West region, which has a population of over 13.5 million people
- the second largest city in Russia and fourth one in Europe, with a population of over 4.5 million people
- a city with a very convenient geographical location. One of the biggest transport ports in Russia for both freight and passenger carriers. It connects Russia with the Baltic States, Scandinavia and Western Europe
- a key platform for the implementation of large-scale investment and construction projects.
